### **DETAILED ACTION**

The following office action is a responsive to the Amendment filed, 04/25/05.

The amendment filed 04/25/05 affects the application, 10/760, 970 as follows:

1. Claims 65-68 have been cancelled. New claims 78-87 have been added. Applicant's terminal disclaimer in compliance with 37CFR 1.32 (C) has overcome the nonstatutory double patenting rejection over U.S. Patent No. 6,699,848 B1, made in the prior office action. This leaves claims 69-87.

The responsive to applicants' arguments is contained herein below.

Claims 69-87 are pending in application

#### ***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the city and either state or foreign country of residence of each inventor. The residence information may be provided on either on an application data sheet or supplemental oath or declaration.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 69-87 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1623

The word "linker" in claim 69-75 and 78-87 renders the claims indefinite. This word are not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. More specifically, it is unclear what constitutes a linker (especially in terms of names, structures or chemical entities) and which linkers are being claimed by applicant, especially since said linker(s) are integral part or components of the claimed compounds or compositions.
